On the Road to Net Zero - Certification

To be certified On the Road to Net Zero businesses are required to conform with the criteria of the relevant net zero sector protocol, complete key tasks and make climate commitments:

Complete an annual footprint

Complete our annual carbon footprint calculation, in accordance with the requirements of the relevant Net Zero protocol.

Commit to ambitious targets (Professional Services)

Take action to achieve the following ambitious GHG reduction targets in order to restrict warming to less than 1.5°C:

Near term
At least 50% **(7,082.28 KgCO2e)** reduction of our scope 1 & 2 emissions by 2030.

Near term
At least 30% **(16,511.75 KgCO2e)** reduction of our scope 3 emissions within 5 years.

Long term
At least 90% **(62,283.36 KgCO2e)** reduction across all of our emissions, including scope 3, by 2050.

Aspen Waite has met the necessary standards and commitments & is certified "On the Road to Net Zero"

Compensate for residual emissions

Once we reach the long-term reduction target, we commit to purchase and retire certified carbon offsets equivalent to our remaining emissions.

Agree to publish GHG data

To demonstrate our commitment to transparency and advocacy, we will publish each year the validated annual footprint, targets, action taken and progress towards reaching net zero.

Scope X

We confirm that we screen revenue from services and that more than 50% **(0 KgCO2e)** of this revenue comes from customers that have a positive or neutral impact on the environment. (For more information on this, please refer to your Net Zero Protocol, available on the dashboard, or email us.)

Methodology statement

The methodology for calculation of the GHG Inventory aligns with the **GHG Protocol Corporate Standard** and emissions factors are taken from Government issued or published and peer reviewed sources including: BEIS / UK Government, Poor and Nemecek, Ciel, Clune et al, Carbon Trust 2018, Agribalyse, Carbon Cloud, Global LCA Data Access, Open LCA nexus, IEA, Electricity Info.

The emissions reduction targets are based on the latest science and align with the ambition of the **Science Based Targets initiative**

For more information relating to methodology and criteria please see the relevant sector protocol here
